July 13, 2017, the Northeast Asia Logistics Information Service Network (NEAL-NET) 21st technical meeting was held in Busan, South Korea. The representatives of the Chinese side of the NEAL-NET Secretariat attended the meeting with relevant government officials and technical experts from Japan and South Korea.

At the meeting, China, Japan and South Korea discussed the work regarding new ports in China, Japan and South Korea in 2017, and the three countries will officially release the newly added Beihai, Qinzhou, Fangcheng, Dalian, Pyeongtaek, Ulsan, Niigata and Yokkaichi, totaling 8 ports in August. About the international cooperation, in order to further promote the sharing of cross-border port logistics information, China actively promoted cooperation with IPCSA, APSN and international ports like Port Sines and Port Klang, and proposed to have the signing ceremony with Port Sines and Port Klang in the 22nd technical meeting. About the

standard-setting, through continuous researches and discussions on the NEAL-NET standards among China, Japan and South Korea, new customs clearance standard code set has been added in the United Nations UN / CEFACT standardization agency in June this year. The further researches on the new container import and export identification in multimodal transport logistics status standards has prepared for the three countries from the container extension to the multimodal. At the same time, in order to further promote NEAL-NET services and improve service quality, the three countries jointly develop a common questionnaire and carry out the questionnaire survey. At the end of the meeting, in order to further promote the cooperation mechanism between the three countries and the port interconnection, china plan to hold the 22nd technical meeting and the workshop on international port logistics information exchange in Hangzhou from November 8 to November 10, 2017.

Through this meeting, China, Japan and South Korea reach the agreement in the standard development, port information sharing, international organization, user promotion and etc. At the same time, China, Japan and South Korea also made new progress in promoting the port interconnection, improve data and service quality through the meeting.
