

MOM of 21st NEAL-NET Technical Meeting

Busan, Korea, 13 July, 2017

1. Mutual Connection Test

- Japan and Korea have finished Mutual Connection Test.
- Japan and Korea notified that Call Sign information from Chinese port needed to complete the test, especially for Wenzhou and Dalian.
- China explained problems on data gathering and announced to provide the data, including Call Sign and IMO number for Wenzhou and Dalian ports by the end of August 2017.
- Related to the addition of new ports, Japan proposed that new ports can be added by using vessel name prior to using Call Sign and IMO number.
- On the Japan's proposal, Korea proposed to have a pilot stage, and Japan modified the proposal to use a 'NOTE' for new added ports, name as Beihai, Fangcheng, Qinzhou, and Dalian, to notify the limitations.
- For the time schedule, CJK had agreed to try to add the new ports by the end of August 2017 after the mutual connection test successfully completed among CJK.

2. Standard of New Events related to Container Procedure

- Japan reported the new standard definition for new events related to container procedures applying to UN/CEFACT.
- China and Korea reported the situation of customs clearance and etc..
- Korea will keep to discuss with related agencies such as customs and private sectors.
- China will keep to consider how to match their domestic interface to the new events' MSS proposed by Japan.

3. Information sharing of Dangerous Goods

- Japan and Korea reported the management process of dangerous goods.
- China will share the information on management of DG by the end of July 2017.
- Related to the DG, Korea will present the results of comparative analysis during the next meeting.

4. User Promotion

- Japan reported the items of the Questionnaire Survey and the schedule for completion of survey.
- China explained some of items to be added to the Questionnaire Survey which suggested by Japan.
- Korea agreed to use the common survey items and explained some items to be asked to Korea only.
- For the schedule, CJK agreed to share the results during the next meeting.

5. Discussion for international cooperation (with IPCSA)

- China reported the agenda of the 22nd Neal-Net Technical Meeting in Hangzhou including International ports promotion meeting. During the International ports promotion meeting, China will invite IPCSA, APSN, Alibaba, Sines port and Chinese ports to discuss international organizations cooperation.
- Related to the topic, Japan and Korea took higher priority on offering stable service among CJK than international cooperation including interconnection with IPCSA and Asian countries in a long term perspective.
- To the comments from Japan and Korea, China announced to keep the effort to promote and cooperate with IPCSA and other international organizations under name of LOGINK and Neal-Net China until next technical meeting.
- For the international cooperation, Korea made a presentation containing the summery of IMO project.

6. Notice of Korean service system changes

- Korea shared the modified schedule of system change from May 2017 to October 2017.

7. Extension of Standard of Container Status

- China side proposed to add new fields into container status information standard
- China suggested to approach system construction and standard definition work separately
- Japan and Korea agreed to have a standard definition work and China will prepare the detailed standard specification by the next meeting.

8. Next meeting schedule

- China suggested holding meeting in Hangzhou, China between 30th October and 1st

November 2017.

- The final schedule will be informed by the end of July 2017.
