

MOM of 20th NEAL-NET Technical Meeting

Tokyo, Japan, 17 Mar. 2017

1. Administrator Manual

- China and Korea confirmed Administrator Manual ver.0.91 and agreed to release the documents only for service provider.
- CJK agreed that data storage period is described at least 3 months in 3.3.2(2).
- Regarding 3.3.4, China turn down their proposal, because of duplicate.

2. New Standard for Customs Clearance

- Japan side applied new status code sets to UNCEFACT through JASTPRO.
- Japan side completed the development for “Cleared for container release” interface in March and will provide the test data to China and Korea by the end of March.
- China will consider integrating container customs clearance status events into current container status query interface.
- Japan and Korea want service type ID “2” for the new customs clearance container status query.
- Korea side continues to discuss with customs and quarantine.

3. Mutual Connection Test

- Japan and Korea have finished Mutual Connection Test.
- China will provide test data for container and vessel status of Ningbo, Zhoushan, Wenzhou and Dalian ports to Japan and Korea by the end of next week.
- China will provide the test data for vessel status of Fangcheng, Beihai and Qinzhou ports by the end of next week.
- In addition to above, China will provide test case for Cargo Smart interface which covers the opened ports for vessel status query in order to supplement about ports by 22nd March.
- Japan will release the IMO number and vessel name interface by end of next week.
- CJK make the joint announcement for 8 new ports expansion after joint test completed.

- CJK will conduct 2nd joint test in April and share the result in the same month.

4. Information sharing of Dangerous Goods

- Korea side will provide detailed survey form of dangerous goods after internal discussion by the end of March.
- Korea will continue to consider how to precede join study of dangerous goods.

5. Discussion for international cooperation

- China reported the IMO survey for Cambodia and requested Japan to consider supporting NEAL-NET interface implementation within JICA project.
- China attended IPCSA meeting as NEAL-NET representative in Barcelona and reported result of meeting. China suggested Japan and Korea to start cooperation with IPCSA.
- If IPCSA officially requests NEAL-NET to open the data of vessel status and container status, the NEAL-NET Secretariat will forward the official request to Japan and Korea. And then Japan and Korea start considering.
- Japan and Korea took higher priority on offering stable service among CJK than international cooperation including interconnection with IPCSA and Russian Far East ports.
- Korea will report survey for Myanmar in the next meeting.

6. User Promotion

- Japan reported the statistics of the number of NEAL-NET users and the result of questionnaire which has been carried out targeting Japanese user.
- Japan suggested to conducting an user survey for promoting NEAL-NET in CJK.
- CJK shared current status in each country and discussed how to promote NEAL-NET.
- Japan will share the questionnaire format with China and Korea then CJK will cooperate to make common questionnaire in the middle of May.
- CJK will circulate the questionnaire and collect answer by the middle of August.
- CJK will share the result by September.

7. Discussion standardization of Port Clearance

- Korea explained the needs of standardization of Port Clearance.
- China and Japan realized this topic is out of current scope of NEAL-NET. China and Japan suggested Korea to consult with high level meeting such as CJK

director level meeting if Korea wants to precede this topic.

- Japan will provide reporting formality of entrance / departure notice to Korea in order that Korea analyzes the current situation of reporting formality.

8. Notice of Korean service system changes

- Korea noticed change information and requested China and Japan to change Korea system access URL, to test service availability at the beginning of May.

9. Next meeting schedule

- China suggested holding meeting in China in Sep. or Oct.
- Korea suggested holding next meeting in Korea in Jun. or Jul.
- Japan stressed the importance of enough preparation for what we agreed upon, including mutual connection test and user survey before next meeting.
- While CJK will consider when to have next meeting based on topics.
- Secretariat suggested having Council meeting and Japan agree to consider when to have.
