From September 22nd to 23rd, the 18th NEAL-NET Technical Meeting was held in Seoul, Korea. Chinese member representatives NEAL-NET Secretariat of the, relevant government officials and technical experts from Japan, Korea, technical representatives of Barcelona Port, Portugal and France attended the meeting.

During the meeting, the three countries made in-depth discussions on the topics of NEAL-NET's new port expansion, joint testing and new standards development. They carefully studied the revision of the Administrator Guideline, the definition of customs clearance events, upgrading of existing dynamic ship standard events' definition and data quality improvement, and hold discussions with the IPCSA (International Port Information Systems Association) on cooperation between NEAL-NET and EU-related ports. Finally, the participants reached a consensus on the meeting topics, formed the meeting minutes .

The meeting made positive results in promoting regional promotion, strengthen international cooperation. Through the meeting, China, Japan and Korea made great progress to promote the expansion of standards and expand the scope of services continuously, while continuing to deepen cooperation with other major international organizations.
