

The NEAL-NET 17th Technical Meeting was held in Japan

From March 3rd to 4th, 2016, the Northeast Asia Logistics Information Service Network (NEAL-NET) 17th Technical Meeting was held in Tokyo, Japan. Representatives and technical experts from China, Japan, and Korea, as well as officials from Malaysia Klang Port Authority, attended the meeting.

With the joint efforts of CJK, NEAL-NET has achieved significant results in the dynamic container vessel status, container status interface sharing standards, promoting the interface standards reform and Interconnection among the major ports of CJK. Based on the previous meetings, the 17th Technical Meeting held an in-depth discussion about NEAL-NET interconnected ports and issues of extending dynamic vessel information sharing from container vessel to other type of ship, seriously researched technical issues such as CJK joint testing mechanism of interconnected ports' data, amendment of Administrator Guideline, upgrades of data quality, and also held a detailed discussion on future cooperation between Port Klang Malaysia and NEAL-NET. Participants reached a certain consensus on the above topics, and then formed the meeting minutes.

This meeting has the participation of countries more than China, Japan and South Korea for the first time, and reflects positive efforts of NEAL-NET in driving regional promotion, and enhancing the effectiveness of international cooperation. Meanwhile, through this meeting, CJK made new progress in promoting the extension of interconnected port and increasing service contents.
