

The 16th Technical Meeting of NEAL-NET Was Held in Korea

From September 10 to 11, 2015, NEAL-NET 16th technical meeting was held in Jeju, South Korea. NEAL-NET Secretariat, government officials and experts from Japan, South Korea attended the meeting.

Under the joint efforts of China, Japan and South Korea, NEAL-NET has achieved remarkable results in dynamic container vessel status and container status standards, promotion of interface transformation according to NEAL-NET standards at major ports opened in CJK and joint testing. The meeting was held on the basis of previous meetings, mainly studied issues such as the data query of ports opened in earlier stage and network applications.

At the meeting, China, Japan and South Korea conducted a thorough discussion about NEAL-NET joint testing, NEAL-NET push delivery service, dangerous goods information sharing, revised the Administrator Guideline, reached a consensus in the port statistical information sharing, service port expansion, the new standard definition, and signed the meeting minutes . Through this meeting, China, Japan and South Korea gained new progress in expanding new ports, enriching the service content, advancing the data sharing and improving the data quality, and also made new efforts for deepening regional logistics information sharing cooperation between CJK.
