

The 15th Technical Meeting of NEAL-NET Was Held in Shanghai

The 15th Technical Meeting of NEAL-NET was held during July 6-8, 2015 in Shanghai, China. Delegates from Department of International Cooperation Ministry of Transport, Research Institute Of Highway Ministry of Transport, China Waterborne Transport Research Institute of MOT(WTI), LOGINK, Guangxi Provincial Department of Transport, NEAL-NET Secretariat, technical experts of Japan and Korea , totally about 15 person attended the meeting.

NEAL-NET is launched by China, Japan and South Korea to enhance the efficiency of regional logistics and promote trilateral trade. As an important component of NEAL-NET cooperation mechanism, the technical meeting is an effective vehicle to smooth logistics information sharing effectively. The 15th technical meeting was held on the basis of previous meetings, focusing on in-depth discussion of solving technical problems and promoting the application.

China, Japan and South Korea studied the NEAL-NET state information sharing, joint testing, Administrator Guideline, new standards definition specifically, exchanged ideas about the current situation where NEAL-NET conduct exchanges and cooperation with international organizations like the European Union and Asian Development Bank, and discussed the future direction of NEAL-NET and the need to advance potential research topics. Through this meeting, the three countries build consensus on expanding service port, enhancing the user push service, and promoting the logistics information sharing. Eventually, CJK signed the meeting minutes, taking a

step toward promoting the regional logistics information sharing and cooperation.
