

The 14th Technical Meeting of NEAL-NET was held in Japan

The 14th Technical Meeting of Northeast Asia Logistics Information Service Network (NEAL-NET) was held in Tokyo, Japan during March 10th – 14th, 2015. NEAL-NET Secretariat members, government officials and technical experts of Japan and Korea, a total of 18 people attended the meeting.

China, Japan and South Korea deeply discussed port interconnection expansion, sharing of Log-in information, NEAL-NET joint testing problems, NEAL-NET push service, railway information system research, formulation of the administrator manual, and the new standard definition of NEAL-NET. The three countries reached a consensus and formed the meeting memorandum on intensifying the promotion efforts in port interconnectivity, using excel template to share the login information, adopting the new error message standards, and holding a conference on writing administrator manual. Also, the three countries put forward related suggestions on advancing work to the next stage, thus promoting the interconnection cooperation between CJK on NEAL-NET jointly.
