

The 8th Technical Meeting of NEAL-NET Held in Seoul Korea

The 8th Technical Meeting of NEAL-NET was held in Seoul Korea, from March 19th to 20th 2013. The experts and technicians from China, Japan and Korea attended this meeting. The meeting was hosted by Kim Soo Yeob, the director of Maritime Affairs Research Department, Korea Maritime Institute.

For further cooperation issues, the Three Countries have some agreements as below : Firstly, the Three Countries agreed to announce the dynamic vessel status information sharing service, which included 4 or 5 ports from China, Kawasaki Port, Osaka Port and Kobe Port from Japan, Gwangyang Port and Incheon Port from Korea.

Secondly, the Three Countries agreed to speed up co-construction on NEAL-NET standard, and try to define the unified URI standards for call sign, container number and goods declaration number.

Thirdly, for NEAL-NET unified user management principle, Three Countries still need to discuss and research for the below three aspects cooperatively. There are the Domain Code Definition, sharing user schema information among CJK and developing a

software kit of SAML.

Fourthly, the Three Countries jointly agreed that the 9th technical meeting of NEAL-NET will be held in June 2013 in Seoul Korea.

During the meeting, Japan and Korea sides expect the port logistics statistics information sharing service will be realized before the 9th technical meeting of NEAL-NET. About the next step working plan for cooperation with other countries, the Three Countries should actively attend the Asia-EU cooperation workshop in Brussels, and to submit the instruction of NEAL-NET concept, and work together to apply for the APEC project.
