

The 2nd NEAL-NET Technical Meeting Was Held in NingBo, China

The 2nd NEAL-NET Technical Meeting was held in 19-22 June, in NingBo, China. Three people from Japan including Mori Hirotsugu (Secretary-general of NEAL-NET), director for International Logistics Policy Planning Ministry of Land, Infrastructure, Transport and Tourism, 9 people from Korea including KIM, CHIL HO (Vice Council chair of NEAL-NET), Deputy/Director of Ministry of Land, Transport and Maritime Affairs. Total 50 people coming from China including Mr. Li Zou, director of Technology Department of MOT, China, Mr. Fei Yan, Water Transport Bureau of MOT, Ms. Wei Feng, Vice Council Chair of NEAL-NET, Mr. Hu Yijun, Secretary of NEAL-NET and the international project group of Logistics public information platform, delegate of enterprise, technical staff attended this meeting.

After the memorandum of NEAL-NET was signed by CJK in December 2010, three countries cooperate to push network sharing and have more progress. In the 1st Technical Meeting at April in Pusan , three countries discussed the interconnection pilot

technical scheme, interconnection interface standards, information and future plan and cooperation. 3 countries agreed on dynamic vessel pilot project scheme and interface standards, sharing information and so on. But there are some sharing information and safety certification technical that have to discuss and confirmation. This meeting discussed dynamic vessel data interconnection technical scheme and standards (including dynamic vessel schedule data elements and vocabulary, interface standards), NEAL-NET council rule and secretariat work process, the pilot port and logistics statistics based on the Pusan meeting. In meeting time, all participants visited NingBo Port.

3 countries agreed on items including data definition, interface, and development implementation and signed the MOM of meeting. The items below:

1. Agreements on dynamic vessel schedule data elements and vocabulary.
2. Agreements on dynamic vessel schedule interface definition.
3. Basic security mechanism such as access log during pilot phase.

The three Countries agreed to have project meeting (remote conference) during pilot project every 2 weeks. The three Countries' NEAL-NET secretariat report technical agreement to the three Countries' NEAL-NET Steering Committee and get approval respectively. After approved by The Three Countries, NEAL-NET secretariat will publish pilot technical specification.
